3GPP Release 17: 5G Media Streaming & 5G Broadcast powered by 5G-MAG Reference Tools

Daniel Silhavy
Fraunhofer FOKUS

Mile-High Video 2023

5G-MAG: MEDIA + ICT + COLLABORATION

5G Media Streaming LTE-based 5G Broadcast Dynamic QoS Policies UE Data Collection and Reporting 5G Media Streaming over eMBMS MBS User Services Edge Media Processing eXtended Reality

Open Software Toolbox for Connected Media Applications

Transforming open standards into services and applications

Why 5G-MAG Reference Tools?

Developer Space https://developer.5g-mag.com

Open Community of Developers

Open developers' community sponsored by 5G-MAG members

Reference **Implementations**

Reference implementation of 5G media platform components and features

Feedback to standards experts

Facilitating exchange between developers and standardization experts

IPR-friendly License Model

Developed to foster contributions, demos, testing, commercialization

Current list of official contributors

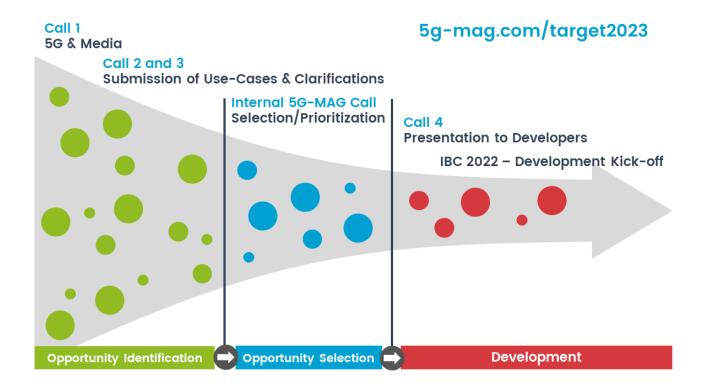

5G-MAG Target 2023 – Development Program

Target 2023: Use-Case-driven implementations

- B B C Reliable Video On-Demand over Mobile Networks with 5G Media Streaming

 B B C Reliable Personalized Live Radio over Mobile Networks with 5MBS

 5G Broadcast On-Demand with 5G Media Streaming

 Premium and Targeted Content Insertion with 5G Media Streaming

 Qualcomm DVB-I over 5G Media Streaming
- Qualcomm DVB-I Hybrid Service over 5G Broadcast and 5G Media Streaming
- Qualcom Emergency Alerts and Media Services through 5G Broadcast
- Contribution to LTE-based 5G Broadcast completion and Multicast-Broadcast Service (MBS) and satellite/NTN broadcast integration

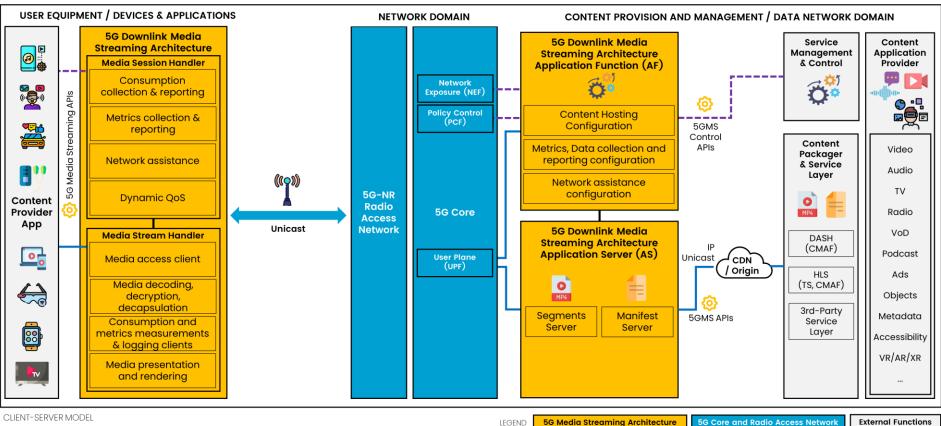

Join the development efforts in 2023!

CLIENT-SERVER MODEL
